

## COVID-19 Vaccination operation

Vaccination is the best means of protection against COVID-19 and its complications.

The vaccine is recommended for the entire population age 16 and over.

**TWO DOSES of the COVID-19 vaccine are necessary.**

**The vaccine takes effect in 14 days.**

**The 2<sup>nd</sup> dose is important.**

**I MUST KEEP FOLLOWING THESE MEASURES:**

**Keep your  
distance**

**Wear  
a mask**  
(if less than  
2 metres)

**Wash  
your hands**

**EVEN AFTER I'VE BEEN VACCINATED.**

# STEPS TO FOLLOW

1.

I take out my health insurance card or any other piece of identification.  
I put away all my accessories (keys, telephone, mittens, etc.);

I stand in line on the floor stickers.

WASH YOUR HANDS

REMOVE YOUR MASK

WASH YOUR HANDS AGAIN

PUT ON THE NEW MASK

2.

I must wash my hands and take off my mask.  
The attendant will give me a new mask that I must wear.

3.

At the registration table, I wash my health insurance card with hand sanitizer before presenting it.

4.

At the vaccination table a nurse will explain everything to me.

A nurse will vaccinate me.

5.

After receiving my vaccine, I must stay in the rest area for 15 minutes.
